

Enterprise IT Knowledge Base

This document provides enterprise IT troubleshooting guidance for the Enterprise Service Copilot agent.

VPN Connectivity

- Check internet connection.
- Restart VPN client.
- Verify username/password and MFA.
- Reconnect after reboot.
- Escalate if authentication/server errors persist.

Password Reset

- Use self-service password reset.
- Complete MFA.
- Unlock account if locked.
- Contact IT if unsuccessful.

Email & Outlook

- Check internet.
- Verify mailbox quota.
- Restart Outlook.
- Recreate Outlook profile if needed.

Microsoft Teams

- Sign out/in.
- Check service status.
- Clear cache.
- Update Teams.

Wi-Fi

- Toggle Wi-Fi.
- Forget and reconnect.
- Restart router if applicable.
- Update network driver.

Printer

- Ensure printer is powered on.
- Check network.
- Clear print queue.
- Reinstall driver.

Laptop Performance

- Restart device.
- Free disk space.
- Close unused apps.
- Run antivirus scan.

Blue Screen

- Note error code.
- Disconnect peripherals.
- Boot Safe Mode.
- Run diagnostics.

Software Installation

- Verify permissions.
- Download approved installer.
- Restart after install.

Ticket Guidelines

- Low: minor issue. Medium: affects work. High: business-critical outage.

Security

- Never share passwords.
- Enable MFA.
- Report phishing immediately.

Escalation: If troubleshooting does not resolve the issue, create a support ticket including title, description, category, priority, and affected system.
